Organize Your Videos

Instructors can now reorder their LATTE videos on the course homepage.

Step-by-step guide

1. Request videos or add previously requested videos to your current class. (For more information, please see here.)
2. Once the videos have been added to the course, enter your LATTE course homepage. Click the “turn editing on” button, and locate the LATTE videos block. Commands to hide (or show) videos will appear next to each title, along with up and down arrows.

Note: If you click “(hide)” the video will not be visible to your students and the title will be moved to the bottom of the list. Additionally, hidden titles do not have arrows. You must show the title to move it. When you click “(show)” the video will be made visible to your students and the title will be moved to the top of the list.

3. Click the arrows to move film titles up or down. Each time you click the arrow the title will be moved up or down one spot.
