iOS: Connect to eduroam

- Using the Configuration Assistant Tool to connect your iOS device (iPhone, iPad, etc.)
- Manually Connecting your iOS device (iPhone, iPad, etc.)
- Forget other Brandeis Networks
- Related Articles

**Hot Tip**
The most common error is failing to include "@brandeis.edu" when typing your username to connect to the eduroam

Using the Configuration Assistant Tool to connect your iOS device (iPhone, iPad, etc.)

1. Download the configuration tool for iOS
2. Once downloaded, the **Install Profile** process will automatically begin, tap **Install**

3. When prompted, enter your **Phone Passcode** and tap **Done**

4. You will receive a warning about installing a certificate on your device, tap **Install** and then **Install** again.
5. You will be prompted to **Enter Username**, supply your Brandeis user name followed by "@brandeis.edu" (username@brandeis.edu) then tap **Next**

6. You will be prompted to **Enter Password**, enter your Brandeis password and tap **Next**

7. You will again be asked to **Enter Username** and **Enter Password** (but for a different network), these fields should be left blank, click **Next** to move on
8. Once the installation is complete, you will see the screen below and be connected to the eduroam network, tap **Done**
1. Open Settings Wi-Fi
2. Select eduroam from the list of available wireless networks
3. Enter your full username@brandeis.edu email and password, then select Join.
4. iOS will prompt you to accept a certificate. You must tap Accept or Trust (depending on the version of your phone) to continue. You should now be connected to eduroam!
Forget other Brandeis Networks

You'll also want to forget other Brandeis networks so that you don't connect to them accidentally.

1. Tap Settings, then Wi-Fi.
2. Once connected to `brandeis_open`, `brandeis_guest`, or `brandeis_secure`, tap the little blue info circle.
3. Tap to Forget this Network.
