Make Your Course Available to Students

In order for students to have access to your LATTE course, you will need to open your course to them.

Step-by-step guide

1. Open the LATTE course you are teaching.
2. Look for the block on the left-hand side column of the page entitled “LATTE course tools”. If the block says “Show Course”, your course is currently hidden from students.

3. Click the first option that says “Show Course”.

4. After the course visibility is set to Show, the option will change to say “Hide Course”. You can click on the button again to hide the course from your students.

For more information on LATTE settings, click the Configure Your Course Settings page.
