Adobe License Renewal (2018)

Beginning in October 2018, individuals who have Adobe Creative Cloud Products (e.g. Acrobat, Photoshop, InDesign, Illustrator, etc.) associated with the Brandeis site license installed on their computers received a notification that the Adobe license would expire on November 30, 2018. This page contains instructions on how to re-license the Adobe products. Unless directed by ITS staff, do not "sign in" to the Adobe products, as this will un-license the products installed on your computer.

If you see a notice like the one below when trying to use Adobe products on your University-owned computer, these instructions are for you.
