Web Conferencing

Media Technology Services currently offers 2 different video conferencing software options. There are many different purposes/use cases for video conferencing, so it is important to identify your objective when deciding which service makes the most sense for you.

The options currently available are:

- **Zoom** - Mainly used for online teaching or meetings requiring advanced interactive features such as hand raising and breakout rooms.
- **Adobe Connect** - Limited licenses, available by request. Also, mainly used for online teaching. Includes advanced interactive features.
